About Us

We are a group of students from Cupertino High School who want to make a global impact.

Mission and Vision

As part of our goal to make a global impact, we first need to recognize the immense variety of socioeconomic problems that currently affect humans around the world. While several hackathons exist to target specific problems, they lack immediate relevancy to many hackers - which is where we seek to make a change. With SigmaHacks 3, our mission is to provide hackers around the world with the resources and opportunities they need to solve a problem affecting a specific region, allowing us to foster innovation, encourage diversity, and make progress worldwide in areas that would otherwise be overshadowed and overlooked.

Sponsorship Tiers

	Delta	Gamma	Beta	Alpha
	\$250	\$500	\$1000	\$1750
